Master 2

SCIENTIFIC COORDINATORS

Cell / gene therapy

Pr Florence SABATIER
Pr Jérémy MAGALON

Imaging & theranostic agents

Pr Benjamin GUILLET
Pr Philippe GARRIGUE

I.V. Diagnostics

Pr Romaric LACROIX

innovative
diagnostic & therapeutic
drugs & health products

WHY ?

Consider this M2 program if :

- You wish to apply for a **job position** in a pharmaceutical industry in this field *and/or*
- You need to **complete your knowledge** about innovative drugs and health products *and/or*
- You wish to continue with a **PhD in this field** for academic or industrial perspectives

WHO ?

- **Scientific students** (\geq Master 1)
- **Pharmacy and medicine students**
- **Pharmacy, radiopharmacy and medicine residents**
- **PharmDs, MDs**
- **Technologists**
- **Biomedical engineers**
- **Biomedical technicians**

Contact us if you are not listed above !
Applications from worldwide can be considered.

MANDATORY BASIC COURSES

State of the art, regulation, ethics, preclinical and clinical R&D, manufacturing and pharmaco-economics of :

Imaging, embolic and theranostic agents

Cell/gene advanced therapy medicinal products (ATMPs)

In vitro diagnostics

Communication, English

Translational project management

OPEN-CHOICE ADVANCED COURSES

Pick 4 from the following :

R&D of imaging, embolic and theranostic agents

Industrial development and manufacturing of imaging and theranostic agents

Cell/gene-based therapeutics in hematopoietic disorders

Industrial bioproduction

Industrial developments and clinical validation of *in vitro* diagnostics

New biomarkers for *in vitro* diagnostics

Marketing

PACK

Entrepreneurship and intellectual property

Leadership and team management

Management of innovation in health

12-month apprenticeship

in the industry
(coll. CFA LEEM)

or

6-month traineeship

in a certified research unit
or in the industry,
in France or abroad
